LONDON, Aug. 29 (NYT) .-tional election, the British are preparing for another in a mood of bewilderment and disquiet over the nation's probblems and with a notable lack of enthusiasm for another

Prime Minister Harold Wilson, the Labor party leader who finds himself hobbied by lack of a majority in the House of Commons, is expected to announce the date of the voting soon. His ministers are predicting Oct. 3 or 10.

Although the 58-year-old Prime Minister remains on va-cation on the Isles of Scilly. the pre-election battle is well under way. Edward Heath, the Conservative party leader ousted as prime minister in the February election, is back from sailing, and Jeremy Thorpe, the Liberal leader, is startling swimmers with a Hovercraft invasion of the shores of Devon and Cornwall.

"It was the nearest any politician has come yet to walking on the water," the Daily Express said.

If that brought a smile, it was a rare one. The British are not in a happy state over their political or economic condition and are unconvinced that another election will solve

"We just don't thunk any of the political parties has the answer," a Londoner said. ~Heath didn't beat inflation and under Wilson it's all worse. There doesn't seem to be any

Although the Labor and Conservative leaders agree on very little, both say that Britain is Second Vote in Same Year Expected in Early October time in 50 years that the British have had two elections in

2 Cosmonauts Found Healthy; Their Night Landing Praised

By Christopher S. Wren

MOSCOW. Aug. 29 (NYT).- noted that the abrupt return may The two Soviet cosmonauts who manned Soyuz-15 were pronounced in good health today following their sudden return late vesterday in what was hailed here as the first landing of a spacecraft at night.

The cosmonauts, Lt. Col. Genhady Samianov and Col. Lev Demin, touched down at 11:10 p.m. Moscow time (2110 GMT) about 20 miles southwest of the city of Tselinograd in eastern Karakhstan, according to Soviet press reports today.

The two-man crew was met by search helicopters in cloudy, rainy weather only 17 minutes after the Soruz capsule landed by narachute, the government newspapers, Izvestia, said.

In a dispatch from the space complex at Baikonur in central Kazukhstan, Izvestia described the touchdown as having "great unportance" and asserted that such landings could become "the usual standard procedure" in the

Point Not Clear

However, it was not clear whether the night landing was scheduled or was caused by an quergency. The Soviet space program, like the American program. has tried to bring its spacecraft down in daylight, although Soyuz-10 returned at dawn in April,

The Izrestia article and another dispatch by the Soviet press agency Tass today also offered nothing to resolve widespread speculation here as to why a mission that was highly publicized at its outset lusted only 48 hours. The far more subdued treat-

ment given the cosmonauts' return was taken here as further cridence that something in the Soyuz mission had gone wrong, although the official press gave no indication what the problem micht be.

Today, the morning newspapers here offered only a dayold Tass announcement that the mission was being concluded.

Shortly before the announcement, Premier Yitzhak Rabin told The new Tass dispatch on the the Histadrut, the labor federareturn reported that "a medical tion, that Israel is going through examination carried out at the one of its most difficult times landing site has shown that "and its security requires a mili-Sarafanov and Demin are in good tary strengthening without prechealth," eliminating speculation about the condition of the crew.

Limitations Eased

Their night landing raised prospects of removing some current limitations on space descents, the Izvestia dispatch said. It noted that touchdown in darkness "may become necessary in case of emergency landing and in the future will possibly become the usual standard procedure."

Western scientific observers here believe that a malfunction possibly occurred in the Soyuz docking thanism, sithough it was siso

Costa Gomes Seems Lisbon Victor

By Miguel Acoca

LISBON, Aug. 29 (WP).—Gen. Francisco da Costa Gomes, the deputy chairman of the ruling junta and chairman of the Joint Chiefs of Staff, appears to have won a major struggle for power against the idealistic Coordinating Committee of the Armed Forces Movement.

The general's victory was confirmed yesterday by the announcement of a decree giving Gen. Costa Gomes complete control of the Portuguese armed forces, granting him status equivalent to that of the Premier and placing the military establishment under Gen. Antonio de Spinola, Portugal's provisional President and tunta chairman

The move clearly strengthened Gen. Spinola and moderate officers, who fear the progressive ideas of committee members, their cooperation with Communists, Socialists and liberals and their decolonization program.

One of the apparent losers, a ranking member of the progressive Coordinating Committee, said the struggle was so heated that it threatened to break out into violence during the weekend as officers who participated in the April military revolt split into a faction backing Gen. Spinola, led by Gen. Costa Gomes, and a progressive

"The danger of an open clash over," the officer said. "It was

hard going but we have reached

At issue were control of the military services, the election of representatives to replace the Council of State officers who have become cabinet ministers and the political activities of such progressive members of the Coordinating Committee as Maj. Victor Alves, a minister without portfolio and acting deputy premier. and Maj. Ernesto Melo Antunes, a Marxist who was slated to become head of the military junta. in Mozambique.

Mai. Melo Antunes suffered the brunt of the Spinola faction's attack, which effectively canceled his nomination to go to Mozambique as head of the government which will negotiate independence with Frelimo, the leftist libera-tion movement of Mozambique. He was blackballed because of his olitical views, according to as-Sociates.

To demonstrate that he had the backing of many officers who took part in the April uprising which deposed the dictatorship, Gen. Costa Gomes was the first to sign a letter aimed at cutting the power of the Coordinating Committee. His signature at the top of the list made it easy to collect at least 700 other signatures, roughly half of the Armed Forces Movement membership. One of the main points of the letter, which was widely circulated here and shown to the mili-

"The engineers are readying planes now." Airport officials said the engi-

neers returned to work after talks between representatives of the 1,600-man ground-crew union and TAP and Labor Ministry officials.

Union officials did not say whether an agreement was worked out with management over the wage dispute or whether the government had decided to enforce a decision to place the company under military control, which mean that any union member refusing an order to resume work could face court-

Angela Referendum

BRUSSELS, Aug. 29 (AP).-The Angolan liberation movement Units said today that it could not accept Portugal's proposal to organize a referendum on independence in the African territory.

Unita's foreign secretary, George Sangumba, told a Brussels news conference, "We canand this is why we refuse [Porde Spinola's proposal to organize a referendum. It is out of the question. We have been fighting for 14 years for the principle of independence."

The Gold Standard

NPOLEON

BRAS D'OR

embassies, was that the politicking of the committee among officers and soldiers had to stop. The letter also deplored the committee's demands for a major purge of officers who advanced their careers under the dictator-

The letter charged that the committee, which was not created by the Armed Forces Movement, was trying to usurp the role of spokesman for the movement in order to promote its views, which were not necessarily those expressed in the movement's program to create a democracy and to end the colonial wars in Portugal's African colonies. It also accused the committee of organizing "clandestine meetings to criticize high offi-

As the movement's officers took sides, they held separate meetings here and planned strategy. Gen. Spinola took part on the side of Gen. Costa Gomes. He was said to feel that his role as provisional President lacked meaningful power because he was not really commander in chief of the armed forces, which until vesterday's decree were under the Premier and the defense minister.

The new military structure also eclipses the power of the Continental Operations Command. the territorial security command led by Brig. Gen. Otelo Saraival de Carvalho, who had sharply criticized Gen. Spinola and Gen. Costa Gomes for not joining the uprising until the last moment

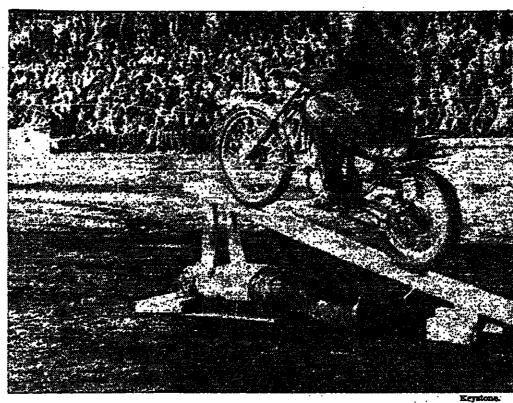

The letter made it clear that Gen. Costs Gomes and the other signers were prepared to "take drastic action" against those seeking to undercut the movement's program and pledged their loyalty to the military hierarchy and the seven-man junts.

The air force and other units were alerted and reportedly gave their backing to Gen. Costa Gomes and Gen, Spinola, But the navy, several garrisons here and draftees promised to side with the progressives on the committee and in the Cabinet of the Premier, Col. Vasco dos Santos Goncalves.

Significantly, after a compromise was reached, Gen. Costa Gomes met dissident navy officers Tuesday at a major base here. A communiqué issued yes-terday stated that Gen. Costa Gomes had "discussed the politico-military situation" and the "need to respect the hierarchy" with the officers He also answered questions by the navy officers, who are traditionally more radi-cal than those of the other services.

Throughout the in-fighting, Gen. Spinola was at a spa 150 miles from here.

The military struggle until this weekend had been between Gen. Spinola and idealistic officers like Col. Gonçalves, Maj. Alves and Maj. Melo Antunes, who became cabinet ministers in last month's crisis after blocking Gen. Spinola's choice for Premier. Now that Gen. Costa Gomes, who was involved in a number of aborted conspiracies against the his weight behind Gen. Spinola. the balance of power has changed in favor of the provisional President and his Gaullist concept of his role and of Portugal's future.

Kissinger Assailed, Defended In Israeli Parliament Debate

-Secretary of State Henry Kissinger was both criticized and praised in parliament here yes-

Mr. Kissinger's popularity, which was high after his efforts in negotiating a cease-fire and separation-of-forces agreement be-tween Arabs and Israelis last year, has declined here as Israeli hopes have waned that withdrawals would lead to more peaceful relations with the Arabs.

A growing number of Israelis have accused Mr. Kissinger of attempting to appeare the Arabs at Israel's expense.

Some of their latest grievances regarded as evidence of an erosion of American support for Israel-were outlined in parliament by Haim Landau, a deouty of the pro-American Likud party.

They included the following: • A joint statement by the U.S. and Jordanian governments, marking the end of King Hussein's visit to Washington earlier this month, pledged consultations on a Jordanian-Israeli disengagement agreement. "Disengagement" is interpreted here as a euphemism for a unilateral Israeli withdrawal from occupied tersettlement

 A joint American-Egyptian statement after Foreign Ministe Ismail Fahmy's visit to Washington this month spoke of resuming the Geneva peace talks and discussing the attendance of "other participants from the Middle East." The reference was obviously to Palestinian organizations, Mr. Landau said, Israel has opposed their participation in the

• Before receiving Israel's acceptance, Mr. Kissinger announced at a Washington press conference that Premier Yitzhak Rahin had been invited to meet President Ford in Washington in September. Critics here said this was highhanded.

"He summoned you, Mr. Premier," Mr. Landau exclaimed, pointing to Mr. Rahin, seated at the cabinet table, "He didn't invite you." Mr. Rabin chuckled.

Mr. Landau said Mr. Kissinger was seeking to press Israel into surrendering occupied territory step by step. "He is aware that he cannot destroy us with one withdrawal blow," he said. "The people will reject it."

Allon to the Defense

In defense of Mr. Kissinger, Foreign Minister Yigal Allon replied that he also regretted some of Mr. Kissinger's actions but that he nevertheless regarded him as a "true friend of Israel who manifested friendship in hours of trial." He reminded the parlia-ment that Mr. Kissinger was the American secretary of state and that his job was to promote the interests and aspirations of the United States, not Israel.

"If we seek prospects of a political settlement in the region to be utilized, we shall not find a more faithful ally than the Unit-

France Reportedly Offering Sophisticated Radar to Syria

France has offered to provide Syria with sophisticated radar equipment to strengthen its defenses, according to reports in the press here today.

The daily newspaper Beirut said that the offer was made at a meeting in Paris on Tuesday between Syrian Foreign Minister Abdel Halim Khaddam and President Valery Giscard d'Estaing of

Mr. Khaddam stopped in Paris on his way home after a visit to Washington.

Arab commentators have said terday's decision by the French government to lift its seven-year-old embargo on the sale of weapons to Middle East combatants favors the Arab states. The report in Beirut, a pro-

Iraqi newspaper, could not be officially confirmed, but Syria is known to have shown interest in obtaining Western-made radar and electronic equipment for its

Syria is generally satisfied with Soviet-built weapons, but press reports here have said that Syrian pilots consider Soviet radar to be inferior to Western-made radar.

Press sources believe that Syria may need more sophisticated radar stations to serve the Soviet MIG-23s received since the Middle East War last October.

The same sources also noted that Syria has been replacing radar stations destroyed by Israeli raids during the war.

The sources, quoting reliable information from Damascus, said that if Syria can obtain highquality radar and electronic equipment, the efficiency of its air force could surpass Egypt's and match Israel's. Press commentators here said

that the lifting of the French embargo opened a new scope for Arab arms purchases. France can supply the sophisticated weapons the Arabs need, and the oil-producing Arab states have the

Guard Charged With Selling 'Escape Kits'

PARIS, Aug. 29 (AP).—A guard at the model prison of Fleury-Mérogis near Paris was arrested yesterday on charges of having sold inmates "escape kits" for 2,000 francs (\$400) a kit.

The police charged that Yvon de Loison, 27, helped in at least five escape attempts, in which two prisoners got

away. The kit, they said, contained saws, ropes and rope ladders, plus instructions on the best route out of the prison after an inmate had sawed the bars out of his cell

The police believe the guard

funds France needs to meet its

balance-of-payments deficit. The Kuwaiti defense minister, Sheikh Saad al-Abdulla, said in a statement that the Arabs "can now buy all kinds of arms from

France."

Premier Takleddin Solh of Lebanon expressed the hope that the lifting of the French arms embargo would be consistent with the pro-Arab policy launched by Gen. Charles de Gaulle before the six-day war, in 1967, when France imposed the embargo to curtail the supply of Mirage fighter air-

Third World Prevails

World Population Conference Radically Alters UN's Plan

By Gladwin Hill

BUCHAREST, Aug. 29 (NYT). Debate here got down literally to the problems of using a single comma and whether a word should be "would" or "should," and finally a demure woman delegate from Iran asked that such issues be settled by immediate votes.

" We haven't had a hot meal in five days," she said plaintively. Then a British delegate suggested the use of "could" as a compromise between "would" and "should."

After 10 days, the UN's World Population Conference last night thus neared the end of its pick-and-shovel work and prepared for two final days of parliamentary formalities to put a seal of approval on its findings

The 135-nation conference's 93point "plan of action"-a set of suggested guidelines for nations in formulating population poli-cles—has been laboriously revised, almost line by line. Details Not Known

Pending completion of a vast secretarial job of codification, no one was sure of the final details that had emerged from the avalanche of 340 proposed amendments to the draft plan prepared at a series of pre-conference United Nations meetings.

What was clear was that the declaration had been radically

reoriented. Its original thrust was that excessive population threatened worldwide development and resources and that population limitation should be a major component of development policies.

As revised, population limitation was pointedly subordinated to economic and social development itself as the prime means. of rationalizing population

In effect, nations antagonistic or indifferent to population limitation took the industrialized nations' history of automatically declining fertility and tossed it back at them, saying, "If that way was good enough, why isn't

it good enough for us?" The change in the declaration's tone was attributable largely to the fact that the underdeveloped nations-which were less active in the original drafting process outnumber the advanced nations by more than two to one both in the United Nations and at this conference.

80 Million a Year While most of the world's population growth—now approaching 80 million persons a year—is cencalled Third World nations of Asia, Africa and Latin America. and while some of them are concerned about excessive population and resultant dilution of canital and material resources the debate here has shown that those nations are far more preoccupied with development.

Noting that most of the proposed amendments to the declaration had come from Third World countries, All Oubouzer of Algeria, who presided over the principal debates, said at a news conference yesterday:

"The underdeveloped countries want to restore the paramountcy of development over the matter of negatively influencing fertili-

In many of their parliamentary maneuvers, the Third World countries have been supported by the Soviet-led Communist bloc. which aspires to leadership of the Third World.

The poorer countries have also received a degree of tacit support from some of the advanced nations such as Sweden, which attach much importance to economic development and have seen their own birth rates decline as development occurred.

Basic Recommendation

The draft action plan's basic recommendation is that nations strive to reduce the present 2 per cent annual world popula per cent annual worse popula-tion increase to 1.7 per cent by 1985—with the reduction to be effected entirely among the de-veloping nations, which have about two-thirds of the world's nearly four billion people.
The United States proposed a

more ambitious objective—a systematic effort to attain "a re-placement level of fertility, an average of two children per family, by the year 2000," But the entire trend of the conference has been away from any such undertaking, rather than toward it. The advanced countries have received an emphatic message from the Third World that it wants a far larger measure of assistance in economic development Most of the conference's changes to date in the action plan presumably will be approxed, since it will take a two-thirds vote in the final plenary sessions to block them.

Coup Backers Are Purged By Clerides

NICOSIA, Aug. 29 (AP) President Glarkos Clerides today purged his administration or more officials appointed by the conspirators who deposed Arch. hishop Makarios last month

An official a muncement said that Savas Antoniou, police chie in the Makarios government, wa reinstated. He took over his old post from a police officer ap pointed by the Greek officers of the Cyprus National Guard an by leaders of the Greek-Cypric EOKA-B underground, who joint ly overthrew President Makaric in a bloody coup July 15.

Mr. Clerides replaced anothe anti - Makarios man, Andres Parisinos, who was appointed the rebels as permanent secretar to the presidency. Mr. Parising was the last supporter of the coup who retained a high govern ment post.

U.S. Agency's Procedures Queried

Numerous A-Plant Safety Violations Cited

By David Burnham

WASHINGTON, Aug. 29 (NYT), -The Atomic Energy Commission regularly finds safety violations in more than one out of three of the facilities it inspects, but it imposes a penalty in only a small fraction of even the most serious of these cases, commission records show.

For the year ending June 30, for example, commission inspec-tors found a total of 3,333 violations in 1,288 of the 3,047 installations they examined.

According to the commission's own definition, 98 of these charges were considered to fall in the most serious of three categories of violation and posed a health threat in that they caused, or were likely to cause, radiation exposure to employees or the public in excess of permitted limits. They involved the release of radioactive materials in the envi-

ronment beyond permitted limits or were a security threat, During the year in which its inspectors found more than 3,000 violations, however, the commission imposed punishments on only eight occasions. The commission revoked the licenses of two small companies and levied

civil penalties against six others totaling \$37,000. Possible Dangers The possible dangers inherent in these violations range from

what experts believe is the extremely remote possibility of a major reactor accident, by which hundreds of thousands of persons could be exposed to lethal radiation doses, down to the less remote chance of the accidental exposure of employees working th various kinds of nuclear facilities. "The fact that the AEC finds

violate us in one third of the installations it inspects is clear evidence the regulations do not work," Anthony Mazzocchi legislative director for the Oil, Chemical and Atomic Workers' Union, charged in an interview in his Washington office.

"These numbers are proof positive that the commission is more interested in the health of the corporation than the health of the worker." Dr. Donald Knuth, director of

the commission's regulatory division, defended the enforcement record as being consistent with the commission's philosophy of encouraging industry to responsible for living up to safety regulations.

"By and large," Dr. Knuth said, "I think our enforcement program is effective." Voluntary Corrections

Dr. Knuth explained that, be-fore the commission took the ad-

mittedly rare step of revoking a license or imposing a civil penalty, it requested the corporation in question to make a correction voluntarily, and these requests usually were complied with. The 1973-74 proportion of violations to inspections was not unique. During the last five years, the commission made 10,320 inspections and found 3,704 installations with one or more violations. Civil penalties or some other sanction were imposed only 22

The numbers of installations with violations installations that were inspected and installations that were penalized have emerg-ed from an examination of AEC records by The New York Times at a time when the United States is embarking on a drive to increase both the size and number of nuclear power plants. 1,000 Plants Planned

In the last five years the num-ber of nuclear plants that are operating, under construction or planned has jumped from 104 to 247. The commission's projections call for 1,000 plants to be operat-ing in the United States within the next 25 years. Although the commission has

said that an accidental explosion is a highly remote threat to the public at large, the potential of such an event in a densely populated area has meant that the

commission has adonted increasingly stringent safety regulations. ible injury to the nearly 200,-000 employees the government now estimates are involved in

various facets of the industry is a somewhat more likely danger. While critics of the commission have long urged that stricter safety regulations are required, comparatively few have focused on the question of whether the AEC is adequately enforcing the

It Will Still Use Electric Shock HARTFORD, Conn., Aug. 28

(UPI).—Connecticut corrections officials say they will continue treating sexual offenders with electric shock and hypnetism.

Commissioner John Manson called the federal government's

decision to abandon such programs "gutless." Mr. Manson said none of the 11 convicts treated in the state program, which is for repeated sexual attacks on children, has

been charged with further sex offenses. One inmate has been out of jail for a year, and the

10 others have been free for an average of six months, he said. The inmates, who volunteer for the program, watch slides of nude women and children, state

officials said. There are no shocks when the l'ides of women

are shown, but when children's pictures are flashed on the screen, the impate receives electric shocks in the genital area.

A hypnotist then puts the inmate through an imaginary sex-

ual experience with a child in

which fear and terror are induc-

ed. Both processes are repeated

The blast destroyed two night clubs, a church and a barber

Near the blast scene, autos parked in the street were severely damaged by flying bricks and other debris. A pile of bricks smashed a new Cadillac down to its wheel hubs.

All up and down Ninth Street, a main artery in the downtown area, store windows were broken, Across the street from the blast, front of a three-story apartment

Broken liquor bottles from several liquor stores in the area were strewn about. Policemen patrolled the aree to keep looters away.

Chile Plans Trial For Top Aides of Allende Regime

SANTIAGO, Aug. 29 (Reuters).

A group of former government ministers and supporters of the late President Salvador Allende will soon be tried on charges ranging from corruption to high treason, reliable sources said here. The sources said that the state

had almost finished compiling its evidence but had not yet set the trial date. Some of the group, including the former secretary-general of the Chilean Communist party,

Luis Corvalan, could face the death penalty, they added. Others facing trial include former Economy Ministers Sergio Bitar, Jose Cademartori, Fernando Flores and Carlos Matus, former Foreign Ministers Clodomiro Almeyda and Orlando Letelier.

Most of them were arrested shortly after the military overthrew Mr. Allende's leftist coalition government last Sept. 11.

First Break in 6 Years

Rains Raise Hope in Sahel Drought

rains—even floods—are sweeping parts of the west African famine zone the first real break in the region's catastrophic six-year drought.

Relief agencies say rainfall appears to be "closer to normal" throughout the region than at any time in recent years. But some fear the rains, which

ber, may yet fizzle out and result in widespread crop failures. This would mean another critical year of acute food shortages across the sub-Saharan belt which runs through parts of Senegal, Mauritania, Mali, Upper

run from June through Septem-

Volta, Niger and Chad. How well the rains have per-formed will not be known until the harvest in late October, when crop production can be gauged. "Even if the drought is broken.

continued relief will be required for at least another year," according to a UN relief worker. Meanwhile, relief ageucies are using planes, trucks and trans-Saharan caravans in the struggle to feed millions of near-starving Africans until the hoped-for

The rains have disrupted land transport and isolated villages in

LAGOS, Aug. 29 (AP).—Heavy many areas by wiping out west ains—even floods—are sweeping Africa's primitive network of dirt roads and desert tracks.

A U.S. food airlift, launched in June, is still under way, ferrying grain to remote outposts in hardhit eastern Mali

Huge C-130 cargo planes, which performed similar missions last ear, already have flown more than 4,000 tons of food from Bamake, Mali's capital, to Gao,

Gondam and Timbuktu. U.S. airlifts are also expected to be mounted soon to assist sandswept Mauritania and Chad, where relief officials report "very serious medical and nutritional

U.S. financial aid is being used to mobilize about 2,000 camels in the region to carry 5,000 tons of

food to outlying areas. Truck caravans across the Sahara have been organized by the United States and the UN Office of Sahelian Relief Operations to deliver food to Mali and Niger

from Algeria. An international relief effort has moved 560,000 tons of grainmore than a third of it from the United States — through west African ports since March. U.S. food ald granted to the region since 1972 totals 600,000

tons of grain, valued at more A multidonor mission led by

OSRO will tour the devastated region later this year to make assessments of food needs for the 1974-75 crop year.

But, even if the drought is broken this year, relief workers point out, future problems iscing the vast, sandy wilderness are staggering.

Some estimates have put the death toll as high as a million, although many relief agencies in the field consider that figure wildly exaggerated.

Most officials say communications are so poor that there is no way of knowing exactly how many have perished in the long drought.

Hundreds of thousands of cattle, goats and sheep have died, but again statistics are little more than guesswork.

The UN Food and Agriculture Organization calculates that more than 3.5 million cattle, worth about \$400 million, died in 1973 alone. It is estimated that at least

25 per cent of the cattle herds the six worst-hit nations perished, with the bovine death toll soaring to 80 per cent in some areas.

Hundreds of thousands refugees—again no one really knows how many there are-sit in squalid camps, almost totally dependent on food from abroad for survival. Estimates on hard-core refugees

range from a conservative 250,000 to as many as five million. The nomads, particularly the Tuaregs, the famed "blue men"

of the Sahara, are among the worst off. While farmers can hope to return to the soil and rebuild their dent on their herds of cattle and goats for survival, have lost every-

NATO Planning Sea Maneuvers

BRUSSELS, Aug. 29 (UPI) .-The North Atlantic Treaty Organization will hold a major sea exercise during the second half of September, the erganization announced today.

The two-week maneuver named Northern Merger, will involve land, sea and air forces from nine of the 15 NATO members and take place in the North Sea, the Norwegian Sea English Chan-nel and adjacent land areas

The countries taking part will be Belgium, Canada. Deumark, West Germany, the Netherlands, Norway, Portugal, Britain and the

made responsible for Sikkim's Deserter Claims U.S. Seized Him

On Canadian Soil VANCOUVER, British Columbia, Aug. 29 (AP).-A U.S. Army deserter was arrested at the Canadian border by American customs officials, who claim he was on international soil.
But the deserter's lawyer says

he can produce half a dozen witnesses and a newspaper photo-graph that prove his client was on Canadian soil when U.S. Customs officials hauled him to the ground and pulled him into the customs building.

Ronald Anderson, 31, was arrested Saturday when he and his wife tried to cross into the United States to visit relatives. He was held at Blaine, Wash., and on Monday was transferred to the stockade at Fort Lewis, southeast.

of Tacoma. Mr. Anderson's mother, Betty Peterson of Poulsbo, Wash., said her son deserted from the Army in 1968 after he was denied con-

scientious objector status. He fled to Canada, was granted immigrant status and would have been eligible to apply for Canadian citizenship this fall: and his wife lived in Mission, British Columbia, where he worked as a carpenter.

An Army spokesman at Fort Lewis said Mr. Anderson was being held pending investigation of a charge of being absent with-Thais Act to Cool

Labor Agitation BANGKOK, Aug. 29 (AP).— Thailand changed its labor law Tuesday, loosening curbs on worker organizations and speeding up grievance procedures in an effort to cool down widespread

strikes and unrest. Interior Minister Luang Attasith Sitthisunhorn, head of a top-level committee that has been studying the law, warned yesterday that strict action would be

taken against violators. The new regulations require that negotiations begin within two days instead of 21 after workers submit demands to management. Workers are for-bidde, to strike or management to close down during the first eight days of negotiations. If no progress is made in the first three days a Labor. Department mediator is to step in. After the eight days the two sides way enter binding arbitration.

3onn Security Chief Admits Ie Gave Red Spy Clearance

PONN. Aug. 29 (Reuters).—The iel of West Germany's security rice, Guenter Nollau, admitted a parliamentary commission re teday that his office cleara Communist spy for an offid government post despite "a

.ckgtound the parliamentary commission trying to learn how East Ger-Guenter Guillaume neurated the West German gorament in 1969 and was later omsted personal assistant to reser Chancellor Willy Brandi. Mr. Brandt resigned as chancelin May after Guillaume had en unmasked. The 49-rear-old ent and his wife are still being d m West Germant.

Mr. Nollau was questioned by e commission toda; about three inversations with Herbert chier. Social Democratic parmentary party leader, between me of last year and February this year, but he affirmed that had kept up notes of what was

The anti-government sugarine lick alleged today that Mr. chier was under suspector of ring furthered Guillaume's esnage activity, Mr. Wehner

tend that the Americans here are a source of tension and potential conflict and an obstacle to peace in Korea.

The U.S. forces are under the command of Gen. Richard Stil-well and 16 other generals and admirals. Part of that top-heavy command structure is a leftover from Korean war days, part is from the political requirements of the mission here and part reflects the role of American generals as commanders and advisers of South

It is an open secret that the United States has tactical nuclear weapons in South Kores, although the official policy, as everywhere, is to neither confirm nor deny that Military officers here have two security concerns about the weapons: that they might be overrun and captured by North Koreans or seized and used aggressively by South Koreans.

Military officers said the 38th Air Defense Brigade and its 80 P-4 Phantom fighters are the most important American forces here since they help to offset North Korean air superiority. The brigade also has crucial communications and control functions But the remainder of the U.S. forces have primarily political rather than military significance, especially when the relative strength of South Korean forces against North Korean forces is messured

The South Koreans have an army of 560,000 men, plus a marine corps numbering 29,600, according to the authoritative International Institute for Strategic Studies in London. The North Korean Army numbers 408,000,

Victorin Veterans The South Koreans also have experience as a number of their officers fought in Vietnam. The North Koreans have not fought since the Korean War ended in 1953. In addition, South Korean reserves and militia vastly out-

number those in North Kores. The North Koreans, however, have an edge in armor, which American officers said was not important in Korea's mountainous terrain, and in artillery, which does make a difference because the Communists have more guns with longer ranges.

In the air, the North Koreans have an advantage in both the number and performance of their aircraft. They have 45,000 men in the air force and 600 combat sireraft, including about 130 Russian MiG-21 jet fighters. The South Edward Air Force of 25,000 men has only 200 combat air-craft, including 36 Finantoms.

In this situation, American military officers said, U.S. forces could be withdrawn without upsetting the military balance if four conditions were met:

. If the withdrawal were not consultation with the South Koreans and negotiations with the North Koreans, The United States would like to get a non-aggression guarantee from North Korea and its Chinese and Russian allies.

Ti a \$1.5-billion modernization plan for the South Korean forces were completed. It is running about \$287 million behind schedule as Congress has lagged on appropriating funds.

• If the South Koreans were

trained to take over the weapons and equipment of units such as the air defense brigade and learned to operate its sophisticated nications equipment.

. If the South Koreans improved their command and control capabilities, Some contend that the only way that will hap-pen is for the Americans to leave the South Koreans can run things for themselves.

A Million Demonstrate

SECUL, Aug. 29 (AP).-More than a million South Koreans today demonstrated across the country for the ninth straight day against Japan and North Korea over the recent assassination attempt against President Park.
This was the higgest turnout for a single day since the demon-strations began Aug. 19.

fering to appear before the com-

mission personally.

Mr. Nollau told the commission that Guillaume was the subject of the three conversations he had with Mr. Wehner. Gulllaume became a person sesistant to Mr. Brandt on Dec. 1,

1972, and was officially appointed to the post after a routine security clearance on June 1, 1973. Before that he had served three years in the Economic Department of the Chancellery. Mr. Nollau denied that any in-

fluence had been brought to bear on the security bureau during the processing of Guillaume's

He agreed that his bureau's records showed that Guillaume had worked for the Communist East German publishing house Volk und Wissen before he came to the West, ostensibly as refugee in 1954.

But this aroused no suspicion, he said since Volk und Wissen was not listed in the bureau's central registry as a front for He agreed that a espionage. He agreed that a Communist woman spy arrested in 1961 had also been associated with the publishing house but

Saigon Units South of Hué Are Attacked

Communist Forces Shift to the North

SAIGON, Aug. 29 (AP:.-Heavy fighting erupted for the first time in several months near the old imperial capital of Hué on the coast north of Danang, the Saigon command reported today.

Government forces have been preoccupied for six weeks with enemy attacks south of Danang. Yesterday, the center of pressure shifted when North Vietnamese and Viet Cong forces slammed nearly 2,000 rounds of shells into a string of government positions guarding Highway 1, about 15 miles southeast of Hue, then followed up with infantry assaults, the Saigon command said.

Lt. Col. Do Viet. deputy chief spokesman for the command, aid the fighting was about four miles from Highway 1, the principal north-south highway in South Vietnam that leads to

Col. Viet said the positions hit included the headquarters of a government militia battalion, two militia companies and three squad-size outposts, each manned by about a dozen soldiers. The total government force number

ed about 400 men, he said. Initial reports from the Saigon command said five government soldiers were wounded and about 50 were missing.

The command said 129 North Vietnamese and Viet Cong were killed in the fighting yesterday. Col. Viet confirmed reports that, at about the same time the fighting was going on, an estimat-

For Some Norwegians, Taxes Take Total Income-And Then Some

OSLO, Aug. 29 (WP).—Norwegian factory owner Gunnar Nilsen will pay 145 per cent of his total income in taxes this year. He is one of approximately 2,000 Norwegians who will have to dip mto their assets to pay taxes higher than their yearly

income after a tax law change last year.

"I guess I shall pay that kind of taxes as long as there is anything left of my fortune," Mr. Nilsen said. "But I think it A shipowher who was a member of the advisory State Tax

Board resigned in protest when he found that his tax this year would be around 125 per cent. "I cannot demand morality in tax questions when the state does not bother about such morality." he said.

Until January, the law stipulated that no person should pa more than 80 per cent of income. The Socialist majority in parliament, made up of the Labor party and the Socialist Alliance, abolished that rule.

In the highest income brackets, the tax is 80 per cent. In addition, there is a tax on assets, whether property, shares or money held at home or abroad. This tax amounts to 2.6 per cent

a year and comes on top of the income tax.

For persons with relatively large holdings and relatively low incomes, this combination pushes them above 100 per cent of

The Labor party is preparing next year's budget, to be presented in October, and there are expectations that the 30 per cent rule will be reintroduced.

Of Style and Substance

of communication that has been highly developed, and, with respect to the presidency, has become an important testing ground for all concerned. In Mr. Ford's first exposure to it as President, he conducted himself well. His answers were informed and to the point, and in terms of style and manner strengthened the impression he has made since he was precipitated into his present office.

Style and manner are important in televised news conferences. It is, in fact, one of the faults of this kind of public appearance that the image projected may, for better or worse, seem more significant than the substance of what is discussed. But when a President, like Mr. Ford, has had far less than the amount of nationwide exposure that is the usual lot of elected national officials, the media question-time serves a very useful purpose, for him and for the country.

But no president, dealing with matters wital to the nation, can long expect a suspension of public judgment on issues of substance, and for President Ford the most serious confrontation is almost certain to be over his policies on inflation. Indeed, that confrontation has already begun, in the wake of his comments on Wednesday on that complex and vital subject.

From the outset, it was clear that Mr. Ford's own tendencies lay in the direction of what can only be described as a negative approach by the federal government: chiefly, the reduction of national expenditure. His

The American news conference is a form rejection, again, of price and wage controls in the news conference tended to confirm that. And for a country which is experiencing the strange combination of rising prices and diminished production and employment known as slumpflation, such an attitude is not inspiring.

> But Mr. Ford also made it clear that he is not inflexibly wedded either to the policles of the previous administration or to ideas he himself had expressed as congressman. His emphasis on the forthcoming domestic summit conference on the economy, and his desire that concepts useful for improving the economy will emerge from it gives hope that if there are answers to America's role in combatting global inflation and the serious wrenching of old trade patterns that accompanies it, President Ford will be receptive. What role, if any Vice-President-designate Nelson Rockefeller will play in this area is, of course, matter for speculation, but as an economic pragmatist his influence could be important.

This is not a time when economic dogmatism of any brand offers very much hope. Measures to restore stability to prices and incomes must cover such a broad spectrum of domestic and international affairs, must move into such unexplored regions of economic control and encouragement, that flexibility and careful assessment of all the facts and opinions bearing on the case are essential. And President Ford clearly has not yet closed the door to such an innovative atmosphere.

Compassion and Justice

In parroting the view of Senate minority leader Hugh Scott that, since former President Nixon has "been hung . . . it doesn't seem . . . that in addition he should be drawn and quartered." Vice-President-designate Rockefeller has beclouded the imperatives of a legal system grounded in justice

It betokens no absence of a decent sense of compassion to recognize the need for keeping firmly in mind the facts that led to the Nixon resignation. As the Republican minority in the House Judiciary Committee soined the Democratic majority in attesting. Mr. Nixon was neither hounded out of office nor was he hung. What led him to quit was the realization that he would be impeached by the full House and ordered removed by the Senate on the basis of incontrovertible evidence of obstruction of justice—much of it in the form of his own voice on White House tapes.

In making that choice, grave and humiliating though it was, Mr. Nixon avoided the possibility of even more severe consequences -the loss of his pension and other emoluments, which a guilty verdict in the Senate would have entailed. The manner of his departure also deprived the nation and history of the definitive judgment that would have flowed from a Senate decision based upon a full trial. Last March, Mr. Rockefeller himself asserted that resignation would leave "great and unresolved doubt." For his own part, Mr. Nixon, in leaving the White House, was at pains to avoid any personal acknowledgment of wrongdoing, citing nothing more than erosion of his "political base."

If the former President's resignation left the rest of the nation with deeply troubling

questions, it left special prosecutor Leon Jaworski with problems which his duty as an officer of the courts makes it impossible for him to avoid, no matter how painful they may be. Mr. Jaworski has already established a record of convictions and guilty pleas; he has a pending prosecution against John Ehrlichman and other of Mr. Nixon's associates in connection with the Watergate cover-up. It is based in large measure on evidence on which a grand jury indicated it would also have indicted Mr. Nixon had he not then been in the White House. Mr. Jaworski also has continuing criminal investigations into possible violations of the federal tax and gift statutes, in which Mr. Nixon and other of his close associates are

On this record, the special prosecutor and others charged with enforcing the criminal statutes cannot carry forward the cases already under way and ignore Mr. Nixon's central role without doing basic violence to the rule of law and to their own sworn obligations to uphold the laws of the United

It is unpalatable and deeply disturbing to contemplate a former President of the United States in the dock, But to suggest, as Mr. Rockefeller has, that Mr. Nixon be exempted from the legal consequences of his act because he was President would be to establish a perverse precedent that, the higher the public trust one violates, the greater the possibility of evasion of legal responsibility. The time for consideration of mitigating circumstances that might justify clemency is after the rule of law has been impartially applied to all the accused co-conspirators and a judgment made on the

THE NEW YORK TIMES.

Jacob Bronowski

One might say that the greatest achievement of Jacob Bronowski - the mathematician, biologist, historian, public servant and poet, who died at 66 of a heart attack last Friday - was to make science, or rather the philosophy of scientific research, more widely understood and appreciated. A prolific writer and man of sharp wit, he wrote not only many scientific books, but also film scripts and radio plays. His most widely known work along these lines is a 13-part television film series, "The Ascent of Man," produced for the British Broadcasting Corporation, which showed it three times. It was seen in the United States last winter at the Smithsonian Institution and Is scheduled to be aired again in America in November. Similar in format to Kenneth Clark's "Civilisation." Bronowski's series is a personal interpretation of man's evolution from prehistoric primitivity to mastery of the environment - an evolution Dr. Bronowski attributes to the use of man's brain. He viewed our continued use of it with op-

But one might also say that Dr. Bronowski's greatest achievement was to point up. and thereby reinforce, the conscience of scientists. Born in Poland, he moved to England as a young man and taught there until 1964, when he joined the Salk Institute for Biological Studies in La Jolla, Calif. As a British public servant, he studied the effects of atomic bombs at Hiroshima and Nagasaki on behalf of the British chiefs of staff. Public fears that scientists who had worked on atomic weapons had lost their sense of right and wrong are mistaken, he said when his study was completed. "On the contrary, I have found that the conscience of scientists is the most active morality in the world." He kept saying that "morality has the same anatomy the world over." And he devoted his life to defending this morality. The title of one of his best known books. "Science and Human Values," was also the predominant theme of his amazingly varied activities. Jacob Bronowski was one of the great humanists of our time.

While U.S. Fertilizes Golf Courses

By James P. Grant

WASHINGTON-Over the 25 years since President Truman committed the United States to providing technical assistance overseas, developing countries have been urged to modernize their agriculture by use of more chemical fertilizers and the better seeds that need them.

But events of the last year, as a world fertilizer scarcity has emerged, have given that advice the appearance of a cruel trick. Many developing countries, dependent on imports for a sizable share of their fertilizer needs, have seen supplies cut off by the industrial countries at a time of acute food scarcity, endangering the food supply of millions already at the survival line.

With food prices high everywhere, raising farmers' demands in the United States and other advanced countries for already tight fertilizer supplies, major exporting regions have reduced fertilizer exports by various means.

Iapan's Example

For example, the Japanese government, faced with an energy crunch-energy is a principal raw material for fertilizer production
—deliberately reduced production and sent missions to break contracts throughout Asia.

Through an agreement between the fertilizer industry and the Cost of Living Council to increase supplies in this country. the United States discouraged new export contracts during most of the 1974 crop year, which ended June 30, and used the threat of further price controls to keep supplies at home

Shipments of fertilizer under the U.S. aid program also virtually dried up. The ensuing fertilizer shortage in many developing countries, which is now being felt, was the principal reason for the seven-million-ton shortfall in India's wheat harvest this spring.

The UN Food and Agriculture Organization recently estimated the fertilizer shortfall in the developing countries for the crop year beginning this summer to be two million tons. This will probably mean a loss in grain production of 20 million tons, enough to sustain 100 million Asians or Africans for a year.

Diminishing

Diminishing returns from increased applications of fertilizer are complicating the problem and spotlighting the irrationality of the current pattern of fertilizer distribution. Advanced farmers in the industrial countries, who already apply nutrients liberally, get only limited production gains from each additional pound of fertilizer used-often only five pounds or less of extra grain.

By contrast, most farmers in poor countries are using much less fertilizer and an extra pound of nutrient can easily yield 10 to 12 pounds more of grain.

The current global distribution pattern, then, is keeping the most fertilizer where it will produce the least amount of extra food. World food production this year will be millions of tons lower than it could have been if available fertilizer had been distributed more rationally and equitably among the poor countries.

For every dollar's worth of nutrient the poor countries are denied this year, they will likely have to import \$5 worth of food next year. This is a losing proposition that these countries—many of which are already at the economic breaking-point-can ill

Nor does the pattern serve the interests of the United States and other grain exporters. We are caught in an absurd cycle in which a country is refused fertilizer, thus cutting its food pro-duction and raising its import needs (and quite likely faminerelief needs) by more food than the amount we produced with the withheld fertilizer in the first place, thereby further inflating already high world grain prices. This will hurt rich and poor alike.

Or is it possible we will deny the poor countries, where per capita grain consumption is only one-fifth of ours, the food as well? Last year when the United States earned \$2 billion more on its food exports to developing countries through higher prices than it did in the previous year, we reduced our food aid to 4 cent of the 1972 fiscal year level, and about one-half of this reduc-

ed amount went to Indochina. Meanwhile, as the world is caught in a critical shortage of fertilizer for food production, and as we restrict our exports of fertilizer and food. Americans are applying some three million tons of nutrients to lawns, gardens, cemeteries and golf courses -more than used by all the farmers in India, and half again as much as the current shortage

in developing countries.

A sense of priority and some active leadership is badly needed from the executive branch of our government. It should follow the call by numerous senators and representatives early this year for a presidential appeal to the American people to reduce nonessential uses of fertilizer, just as we were asked to turn down our thermostats and slow down our cars.

Such action could free enough fertilizer over the coming year to alleviate the more severe shortages, which, in any case, will beset us for most of this decade. The government should also restore fertilizer-aid shipments to sizable levels and encourage pripoor countries. The time is short and the stakes are high.

James P. Grant is president of the Overseas Development Council, a private organization concerned with underdeveloped countries and their relationship to the developed world. He wrote this article for The New York Times.

Before a Change

U.S. Policy on Cuba: Request for a Debate

By William Safire

succeeds like succession. The suddenness of President Ford's emergence, the delight with which he is widely embraced for the virtue of not being his predecessor, and the correctness of his demeanor have combined to create the atmosphere of success in which success is more likely to be schieved.

Consider the question of Cuba, which was raised and neatly sidestepped at Mr. Ford's first press rence; Richard Nixon's personal dislike of Fidel Castro, along with Bebe Rebuzo's nassionate esponsal of the cause of the anti-Castro Cuban refugees, froze U.S. policy toward Cubaand, therefore, toward the rest of Latin America—throughout the period of spectacular "nor-

malizations " U.S. policy was—and, as the President indicated, still nomi-nally is—to isolate the police state in the Caribbean Everybody knows that the policy, like a bawling baby, is waiting to be changed.

Ludicrous

One reason why: The quarantine is becoming ludkrous, since six members of the Organization of American States have opened embassies in Havana and more are to follow soon. The old fear that Castro would export his Communist revolution has diminished, because dicta-torship of the left is not as efficient as dictatorship of the

Another reason, which will provide the fig leaf for the American turnsround, is that Premier Castro has been looking for the moment to drop his overt hostility, and the best moment is the succession of a new U.S. President. The half-billiondollar-a-year Soviet subsidy does not satisfy him, because he thinks he can do better in normal relations with Western hemisphere neighbors, to whom he has been sending signals of In one of the most bigarre

examples of diplomacy in a television age, Premier Castro has set forth a series of conditions about ending the freeze via a filmed television interview with news entrepreneurs Kirby Jones and Frank Mankiewicz. But that olive branch on film awaits sale to a U.S. television network. like a diplomatic note sent across the seas before the invention of the wireless, it makes its stately way to overtake events.

Coming Apart

With your policy coming apart in full view of the world, with the express reason for your policy—the hostility of the Castro regime—now being removed, and with a need to show that you, too, are capable of would you do if you were a new American president?

You would change the policy and he a hero, right? Only partly right, the way you handled it would make all the difference. If you were to handle it Kissinger style, you would order up top-secret National Security Council Memorandum, you

WASHINGTON. - Nothing would dispatch your national security saviser to a secret meeting on a fishing boat within sight of the lights of Havana and you would announce on national television, with a mystery guest standing in the wings puffing a large cigar, that you have ended the threat 90 miles from our shores that plagued

three previous presidents. That would be The Easy Way. and it is to be shunned if we are to create a foreign policy to advance our interests rather than to interest our advance men. There is no need to follow the Nixon shokkus in Japan with any Ford choques in Latin Amer-

Sol Linowitz, former assistant secretary of state, heading an independent committee to pave the way for U.S.-Cuba relations says: "The greatest frony would be to take such a step in a way that would alienate the very Latin American leaders who want us to take that sten." Neither our Latin America

friends nor the American public needs another twist of needs another twist of join ac compli: We can let the OAS na tions dicker with Cuba individ ually as we debate the pros an cons of establishing relation with Castro's government out it the open.

Sounding Board

The Kissinger foreign relation committee, formerly the Sens: Foreign Relations Committe would ordinarily be the propforum for this examination developing policy, but the con mittee members and staff a too hopelessly committed promoting the restoration relations with Cuba to permit real debate, and too much take by Henry's flattery to offer hi more than a sounding board.

Is there a House Foret Affairs Committee? Is there a forum, within or without gover ment, that will call attention the drawbacks inherent in a necessary change of internation relations, pose questions abo what the change will cost to pavers. make at least a fe morai peeps about encouragi totalitarianism, and suggest or tain standards to be met befo a deal is struck?

... Our secretary of state, accu tomed to dealing in secret w dictators, is now the agent of President with a different sty He would do wall to surprise with no surprises, go public make his case, and thereby the fact of Ford's succession turn the Cuban anachronism in our Latin American opportuni

Arms Deal

James Goldsborough's news analysis, "Arms Deal of Century." (IHT, Aug. 28) clearly made an objective effort to deal with a highly complicated and controversial question, As a representative of one of the interested parties (Northrop), I would like to question, however, his suggestion that the failure of NATO countries to buy French sireraft involves the survival of the European aerospace industry. Indeed, by buying French sircraft, the NATO countries involved might well be perpetuating and indeed widening the technological gap between the U.S. and Europe—and digging the ropean aerospace industry into a still deeper hole.

My company is associated with and intimately involved with several European aerospace companies. We have proposed a coproduction program for both the detion of an entirely new aircraft. the YF-17 Cobra. Foreseeing long ago the eventual requirement to replace the F-104G Starfighters. we have been working with European industry (and, of course, many NATO air forces) on this replacement program for the past eight years.

Using the most advanced technology available in the United States today in propulsion, aerodynamics, avionics, materials, and production, we would hope to contribute substantially to the introduction of the latest technology into Europe. An example: graphite composites, lighter than aluminum, stronger than steel, are used in our airplane and are bound to play an increasingly greater part i all sirplane construction-commercial as well as military-in the future. This is one technology we would hope could be utilized on

It is probably absurd to talk about the "European aerospace industry" until Europe exists. There have been many attempts to form an integrated European aerospace industry, but internal competition within Europe remains violent and nationalistic, even between French companies.

this side of the Atlantic.

Only when American competition enters the field do some Europeans, such as our French friends. suddenly say that the competition "anti-European."

American aerospace research

and development expenditures are 15 to 20 times that of NATO Europe (including France), and it is to a large extent coordinated. European R and D on the other hand, is largely uncoordinated and often duplicative. The technological gap is not the result of superior brains, it is a simple case of organizing and directing the effort. I have always believed, personally, that, indeed, if the Kuropeans joined their efforts, they could equal the American effort at a fraction of the cost in the United States. That day, however, has not yet arrived.

GEOFFREY PARSONS.

The Pope's Jews

William Tuony in his article "Rome Jewish Leaders Fear A Rovival of Anti-Semitism" (IHT). August 13) mentions en passant my new book "The Pope's Jews." He then continues giving quite a lot of historical details about the life of the Roman Jews through the centuries, most-if not all of it—also taken from my book. This includes two quotes one by author-politician Luigi Barzini, and another one about fear of assimilation. Both these quotes are verbally copied from my book (pages 26 and 462), and are not of general public knowledge, having been given to me while doing research on "The Pope's Jews." In all fairness I believe that these facts should have been mentioned by Mr. Tuohy in his otherwise most excellent article.

One more remark: Professor Alfonso di Nila is not Jewish, He the Catholic professor of Religious History at the University of Arezzo, and the man who organized the Italian (non-Jewish) Committee to combat Anti-Semitism, As a last remark, I would like to point out that the Jewish population of the former ghetto area of Rome is not 2500 as Mr. Tuohy indicates,

but only about 500. After the liberation of the Roman Jews in 1870, the narrow streets with their dilapidated houses were razed towards the end of the century, and large buildings-including the huge synagogue, opened in 1904were put in the area, which is so small that one can walkslowly-eround the total former ghetto confines in just seven

Incidentally, for your information, the English edition of "The Pope's Jews" was published in London (Alcove Press, £4.95) the same day it was reviewed in Los Angeles-July 23d.

SAM WAAGENAAR

Lincolnesque What a magnificent start is

President Ford's statement on amnesty. So refreshingly different, in its selfless, embracing charity from his predecessor's divisive vote-seeking tactics. So Lincolnesque and unanswerable in his appeal to "all who ever sought forgiveness for trespasses." So humble in his acknowledgment that he sought guidance from his own children. So devoid of all the arrogance and devicusness we had come to expect automatically from the White House. Truly an

act of moral leadership in highest traditions of the pr dency. I am neither a Republican

ourselves international investment strategists, we had to have the strategies to back it up.

At Daiwa Securities, we call ourselves "international investment strategists." And that's not just another empty advertising slogan.

We've committed ourselves to leadership in all areas of international financial transactions. Innovative leadership. Leadership from the headquarters, 82 domestic offices, 10 overseas offices and over 6,000 trained personnel. Leadership responsible for Daiwa's record growth.

In today's complex financial world, you can't achieve leadership like ours without strategy.

It took strategy, for instance, to manage an international issue of Asian dollar bonds, thus creating the Asian Dollar bond market.

It took strategy to become the first Japanese securities firm to publicly offer shares in a major U.S. mutual fund. It took strategy to become the first Japanese securities firm to initiate the private placement in Japan of notes of a socialist country. First in Japan to achieve private placement of notes of a foreign central bank, Deutschmarkdenominated bonds, floating-interest rate notes, even a "note plus loan" package system.

That's not all we've accomplished. Contact us directly, and find out for yourself how our international investment strategy works.

Britain's Economy Said to Be Worsening

LONDON, Aug. 29 (AF-DJ).-The outlook for Britain's troubled economy is deteriorating rather than improving, according to the latest quarterly review of the National Institute of Economic and Social Research (NIESR).

Under present economic policies, NIESR said, it anticipates "stagnant output, rising unem-ployment and somewhat greater inflation than we foresaw in May, with a slower improvement in the balance of payments.

The institute said the worsened outlook for domestic inflation, currently running at over 17 per cent, is Britain's most important economic problem. NIESR is an independent nonprofit organiza-Hon whose comomic surveys are highly respected_

Biggest Find of North Sea Oil Is Confirmed by Norwegians

OSLO, Aug. 29 (AP).-Discovery of the biggest oil and gas field in the Norwegian sector of the North Sea so far was officially confirmed today.

nounced that the field, to be called Statiford, contains reserves of at least two billion barrels of oil and 50 billion cubic meters of natural gas.

Brent field.

The discovery was made by the Statoll/Mobil group, in which the Norwegian state oil company Statoll has a 50 per cent interest. Operator for the group is Mobil Exploration Norway, which holds a 15 per cent share.

Might Cross the Line

Higher Inflation, Jobless Rates

half of the year while unemploy-ment has been on a definite up-forecast warned of no real im-

NIESR predicted that Britain's gross domestic product would increase less than 1 per cent between the second half of this year

area, concession blocks 33/9 and 33/12, was reported after comple-

The Ministry of Industry an-

The new find is 150 kilometers west of the mouth of Norway's Sognefjord and is just across the dividing line from the British

The ministry said that the oilbearing structure might extend across the dividing line into the British sector in an area where the Conoco/Gulf/National Coal Board group holds the concession rights. Further drilling is required to confirm this, it add-

tion of the first well about six months ago. But official confirmation that the field was commercial was given only after the third well had been drilled on

During tests each of the three wells have yielded more than 10,-000 barrels a day, with one exceeding 12,000 barrels, the min-

Twice Norway's Needs

No production estimates have as yet been given, but unconfirmed reports put the potential at "at least 400,000 barrels a day." This would mean about 20 million tons a year, more than twice Norway's current annual consumption of about nine mil-

The oil-bearing structures were found about 2,600 meters under the sea bed in an area where average water depths are 160

Earlier the Ekofisk field was the largest in Norwegian waters, with estimated reserves in excess of one billion barrels and a planned daily production of 370,-000 barrels, according to official

Other participants in the Statoil/Mobil Group are Conoco Norway. Esso Exploration Norway, and Norske Shell, all with a 10 per cent interest, and the Nor-wegian-American Saga/Amoco Saga/Amoco

look for the country's belance of payments has worsened. Growth of exports and services, which had been "very buoyant recently," is expected to slow down sharply from now on,"

However, NIESR forecasts that imports of goods will rise 1.5 per cent in volume this year and 3,5 per cent in volume next year, "the acceleration being partly accounted for by the expected loss of British price competitiveness. The institute sees a deficit in the current account, which com-prises trade and "invisibles" such as tourism, of nearly \$4 billion this year and £2,75 billion in 1975.

In the first seven months of this

year the current accounts deficit

widened to a record of over £2,4

NIESR also said it expected: · Seasonally - adjusted unemployment to rise to about 675,000 by the end of this year and over 900,000 by the end of 1975. The jobless total is currently about 600,000.

• A 20 per cent rise in average earnings this year and 18 per cent rise next year. Average earnings rose 15.8 per cent in the 12 months ended in June.

· A rise in consumer prices of 16.76 per cent this year and 17.5 per cent in 1975. Retail prices rose 17.1 per cent the latest 12month period. In the half year to mid-July prices rose at an annual rate of over 19 per cent. Real disposable income—because of the massive rise in import prices and fiscal drag will fall 25 per cent this year and another 1.75 per cent in 1975.

• The outlook for private investment "is poor," with a 13.5 per cent rise in manufacturing investment this year to be followed by a decline next year. Private housing investment is expected to drop sharply this year and fall at a slower rate next

The institute said it knew of economic panaceas" would transform the pessimistic outlook for Britain.

It said export-led expansion would be the most desirable means of increasing employment. However, NIESE said the normal manner of raising exports by lowering the exchange rate would probably lead to any competitive pricing advantage being "very quickly eroded by an acceleration of the rise in domestic costs and The institute said its forecast

of Britain's current accounts def-icit shows the "nation living beyond its means this year to the extent of about 6 per cent of

FINANCIAL NEWS AND NOTES

Philips' Unit Plans Bid for Magnavox North American Philips Corp. (NAP) plans to make a tender offer for all the outstanding common shares of Magnavox Co. at \$8 a share. Magnavox president R.H. Platt says he is "dismayed" that NAP would proceed in such a uni-lateral way in such a complicated transaction.

The company's initial reaction is that the book value per share is substantially greater than the proposed offer "and therefore it appears inequitable." Magnavox had 17.8 million shares itstanding at the end of 1973. On that basis the offer would have a value of about \$1424 million. NAP, a diversified electronics and pharmacentical concern, is 61 per cent owned by U.S. Philips Trust, which is owned by NV Philips', the Dutch electronics concern. Magnavos is a manufacturer of consumer, defense and industrial products. If Magnavox is acquired by Philips, it would mark the second time this year that a major producer of television units was acquired by a concern with foreign ties. Last May, Japan's Matsushita Electric Industrial Co. acquired the operating assets of Motorola Inc.'s home television receiver busi-

ness in the United States and Canada. Kaiser Drops Indonesian Project

Kaiser Aluminum & Chemical has dropped out of a \$900-million project to build an aluminum smelter and power facilities in Indonesia along with Aluminum Co. of America (Alcoa) and five Japanese aluminum concerns. There is no "single reason, it's a very complex situa-tion and we can't sum it up," said a Kaiser spokesman commenting on the move. An Alcos spokesman said "at this point we can't say yes or no" on whether Alcoa will participate. Reports from Japan have indicated that both Alcoa and Kalser were dropping out of the project,

but Alcoa denied that it has made a decision yet. The original plans called for construction in northern Sumatra of a smelter capable of handling 250,000 tons of aluminum a year with a possible expansion to 400,000 tons. A 480,000kilowatt hydroelectric generation station was to be built nearby. Cost of the project, originally estimated at about \$500 million, has risen sharply since the plan was disclosed in late

Hoechst Pre-Tax Profit Up 71%

Worldwide pre-tax profit of Hoechst rose 71 per cent in the first half to 860 million deutsche marks. The West German chemical company says the rise came on a sales increase of 28 per cent to 9.7 billion DM. Domestic sales gained 24 per cent to 3.89 billion DM while the foreign share rose 30 per cent to 5.8 billion DM. The company says demand remained lively in the second quarter but that a weakening of the domestic commy, especially in the construction, auto, furniture and textile in-dustries, began to make itself felt. Foreign business and exports rose strongly, it said. First-half results of the French Roussel UCLAF Group, in which Hoechst bought a controlling interest last February, are not yet included in the worldwide figures.

Thyssen Raises Stake in Witten

August Thyssen Huette, the West German steel firm, has increased its stake in the spe-cial steels company Edelstahlwerk Witten to 97.5 per cent by taking over, for an undisclosed sum, the 34.7 per cent interest of Bankhaus Merck, Finck and Co. Thyssen areviously held an indirect majority stake in the company through Rheinstahl, which is now a 100 per cent Thyssen unit.

Hasty, Nationalistic Action Seen Avoided

U.S. Bill Cools Foes of Alien Investment

By Pranay Gupte

WASHINGTON, Aug. 29 (NYT) The legislation that was passed overwhelmingly by the House of Representatives last week, authorizing the government to study all foreign investments in the United States, was supported by various people for various reasons. Both its congressional and administration backers had an important consideration in common. The increasing trend in foreign investment in this country coupled with the fact that the information available on it is simply and badly outdated.

The timing of the bill links it to the burgeoning question of petro-dollars—the fact that the oil-producing countries are now accumulating astronomical wealth and that much of it could be recycled into investing in Amer-

The influx of foreign money into this country, particularly since 1960, when investment from abroad totaled just under \$7 billion, to last year, when, according to the Commerce Department, overall direct foreign investment was nearly \$15 billion and the investment in portfolios was almost \$90 billion, has bothered many members of Congress.

Bills were introduced in the House of Representatives calling for severe restrictions on foreign stment in American industry. High administration officials said in interviews last week that they were concerned that, with that sort of mood in Congress, some "nationalistic, xenophobic" legislation, restricting the inflow of foreign investment, would be has-

Thus, when the bill sponsored

ing for a federal study of all foreign investments here was passed, 324 to 29, a number of high officials in the White House and the executive branch breathed a sigh of relief. A well-placed official summariz-ed the administration reaction:

"An important result of the congressional action will be to lessen the pressures for a more restrictive foreign-investment policy." While foreign investment in this

country has unquestionably stim-ulated competition and has gen-

erally been considered desirable. it has also drawn considerable criticism and resentment.

tion officials is that to charge that foreigners are on their way to taking over the American economy is somewhat irresponsible. They point to the fact that foreign investment constitutes only about 2 per cent of the domestic investment of \$300 billion in the economy.

And administration officials also point with some trepidation to the fact that the book value of American investments abroad is about \$100 billion and that any moves toward a more restrictive policy here might generate recrimina-tions abroad.

Hitachi to Begin **Worker Layoffs**

TOKYO, Aug. 29 (AP-DJ).-Hitachi, a major electronics com-pany, said today it will begin temporary layoffs next month because of Japan's recession.

Hitachi will be the first major electric equipment maker to start layoffs during the current reces-

A spokesman said details will be determined later through negotiations with labor unions at the respective plants.

Engineering. The American Stock Exchange index closed down 87 to 69.03. The feeling among administra-The most active issue was Marinduque Mining class B, closing 21 2 3/8, up 1/8 on volume of 100,000 shares. On the over-the-counter market, the industrial average on the NASDAQ index fell 0.90 to 61.62.

In bonds, Treasury bills moved ahead strongly to close with sharp losses in yield across the board The three-month bill tumbled an almost unprecedented 60 basis points in yield, the six-month bill dropped about 30 hasts points and the new 10-month bill fell around 25 points in yield from yesterday's

auction average.

Dealers said that strong showing of bills reflected the reflow of funds into the system from maturing reverse repurchase agreements which the Federal Reserve conducted on Tuesday and yesterday to drain surplus liquidity from the market.

Corporates, reversing early small gains, ended unchanged to 1/8 point higher in very quiet trading. In Chicago soybeans closed two to 11 cents a bushel lower, and corn followed beans down for final losses of seven to 12 1/2 cents a bushel with wheat closing unchanged to 3 cents down,

In New York, silver futures weakened, closing 14 to 15 cents lower. Copper closed down about one half cent.

French Prices Gain 1.3% **As Jobless Rate Increases**

By Carl Gewirtz

PARIS, Aug. 29 (IHT).—The et of living rose a sharp 1.3 tting the increase so far this ir at 9.7 per cent and for the t 12 months at 14.4 per cent. It the same time, the governreported that unemploynt is on the rise. The number job seekers in July was up 2.2 cent from June and 15.2 per t from July last year while number of job offers fell per cent for the month and

per cent for the year. wat the only good news istoday was a modest decline month of 0.4 per cent in the lessie price index for in-Tial products. But even this s was partly soured by the that the decline in the lous month was I per cent. he July increase in the retail e luden was no surprise since government had authorized in rents and fuel costs ing the month. But food es were up another 0,7 per compared to a rise of 0.9 cent in June, manufactured were up 1.6 per cent comnd to 2 per cent in June and ices increased 1.4 per cent, from 1.1 per cent a month

Slower Increase

nance Minister Jean-Pierre reade said that the July price ease was "still too strong," he emphasized that the inse of the latest three months led 3.7 per cent, compared to 42 per cent of the three preing months.

retail prices rising no more i per cent a month by the of this year and 0.5 per cent onth within a year. wever, for many bankers and omists here the goal is un-

ic government's goal is to

ie government's program is d on sopping up the pur-ing power of both business individuals through surtaxes profits and incomes and inses in the percentage of the bill that had to be paid before final mid-autumn tax date. he same time, the banks have sharply restricted in making loans while the government promised to maintain a baled budget.

Promises Fulfilled

ut a good part of this has n offset by promises made ing the April-May presidential tion campaign and fulfilled Valery Giscard d'Estaing in ing pensions, family allowes and wages.

n addition, business has been to evade the credit restricns by borrowing in foreign curicles. The government has entraged the use of this loophole these borrowings help to in-

France's biggest trailer maker. Titan-Coder, has just arranged a loan of 20 million francs (about \$4.2 million) from the government to resume operations after the August holiday shutdown while efforts are made to find a long-term solution to its prob-lems. The company, which filed for bankruptcy in July, employs about 2,700 workers and accounts for about 18 per cent of the trailer

Pierre Dreyfus, chairman of state-owned Renault, has been named to head the study group. The government favors a solution—such as a take-over by Renault's trucking unit—but industry sources do not rule out a take-over by the French subsidiaries of U.S. firms such as

As for the overall job situa-

workers. Nevertheless, rising unemployment and continuing price increases may provide fresh ammunition for the big trade unions to demand an easing of credit and further wage hikes. Hourly wages rose 6.1 per cent in the second quarter, the biggest jump since the spring of 1968, prompting President Giscard d'Estaing in his nationwide television address Tuesday night to append to labor for restraint in their wage nego-

crease the nation's foreign currency holdings needed to finance this year's trade deficit, which is expected to total between \$4.5 billion and \$5 billion.

However, this loophole is only open to the largest companies in France: They have the credit stending to arrange such loans and often have income in the

Thus, the burden of the credit restrictions is falling on the small and medium-sized firms who are policy Business failures so far this year are estimated at 23 per some 8,000 of the nation's two million firms having closed their

market in France.

Pullman or Fruehauf. tion, the Labor Ministry says the July deterioration is due to the annual arrival of June graduates on the market and it attributed the decline in job offers to the government's decision in June to suspend the entry of foreign

tiations later this year. However. Communist Party leader Georges Marchais hinted yesterday that there could be widespread strikes unless workers roceived pay increases to keep pace with the rise in living costs.

Oil Producers Discuss Production Cuts should Saudi Arabia fall into line with other members.

VIENNA, Aug. 29 (Reuters).— Economic experts from major oil-exporting nations met here today for discussions likely to be dominated by proposals for production cutbacks.

The experts from the 13member Organization of Petro-leum Exporting Countries (OPEC) will hold several days of detailed talks to pave the way for a decision-making meeting of oil ministers next month.

Pressure has been building

among OPEC nations for reduced production to counter the threat of a worldwide glut of oil that would cause prices to drop.

Kuwait, Qatar and Venezuela.
have already trimmed production have indicated they will leave even more oil in the ground if necessary to maintain

But there is uncertainty about the attitude of Saudi Arabia, which accounts for 30 per cent of OPEC exports and has waged lonely fight within the organization for lower prices. Saudi Arabian Oil Minister Shekh Ahmed Zaki Yamani has been urging a price reduction to soften the blow to consuming

nations caused by the fourfold jump in prices in 1973.

But OPEC source- say Saudi
Arabia may be changing its position in a way that would lessen the differences with its OPEC partners in time for the ministerial meetings in two weeks' time. An auction of Saudi Arabian oil that was widely expected to depress prices was postponed earlier this month, and there have been reports of a drop in production to around 7.7 million

barrels a day from 8.5 million

Oil industry sources in Belrut said yesterday that King Faisal of Saudi Arabia had hinted to the United States he would reduce his efforts to lower oil prices if Washington did not put more pressure on Israel to achieve a Middle East peace set-

OPEC sources said the contingency plan for production cut-backs would lose its urgency

U.S. Building Contracts Up

NEW YORK, Aug. 20 (AP-DJ). - U. S. construction contracts rose 3 per cent in July to \$9.3 billion from \$9.04 billion a year earlier, according to the F. W. Dodge unit of McGraw-Hill Inc. However, George Christie, vice-

for Dodge, observed that "inflation has boosted the cost of construction work by nearly 10 per cent" in the intervening year, The Dodge report said nonresidential building surged from the previous July, while nonbuilding construction had a smaller gain and residential con-

struction declined sharply. The Dodge index, which measures relative growth or contraction on a month-to-month basis. rose to 177 from 166 in June. The index uses 100 for the seasonally-adjusted level of such contracts in 1967.

The report said nonresidential

building in July increased 28 per cent to \$3.7 billion from \$2.9 bil-

lion a year earlier.

READY FOR OCCUPATION

from 400 sq.m. to 10,000 sq.m.

can be leased or purchased and include the following features:

- Superb communications via national motorways:

• 10 minutes from Nice International Airport;

Financial and fiscal aids:

• High specification:

· Rents from Fr. 72 per square meter;

· Minimum eaves height 20 feet;

Excellent local labour available.

The confidential expert-level meeting of OPEC's economic commission which began here this afternoon also has to examine the rate of inflation among consumer nations and the changing value of the dollar over the nest three months. Citing inflation, they are likely

to recommend an increase in the posted price of oil, which has been frozen for the past nine months But OPEC sources have said the ministers, who meet here on Sept. 12, would probably pigeon-hole the recommendations and

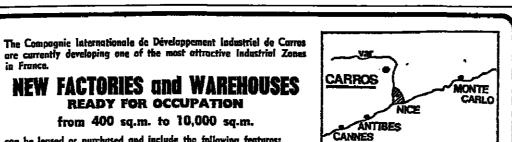

maintain the freeze for the final quarter of 1974. The ministers may compromise on a small increase in royalty rates paid by oil companies to producer governments, following the pattern of their last meeting in Quito in June.

The token increase decided then lifted royalty rates from 12 1/2 per cent to 14 1/2 per cent. OPEC sources said the September meeting might bring a further rise to 16 2/3 per cent In Caracas, meanwhile, official sources said the price of Vene-

zuelan oil will go un again in They said the oil export reference price, which was increased to \$14.43 from \$14.08 a barrel last month, would go up again next month, but would not give a

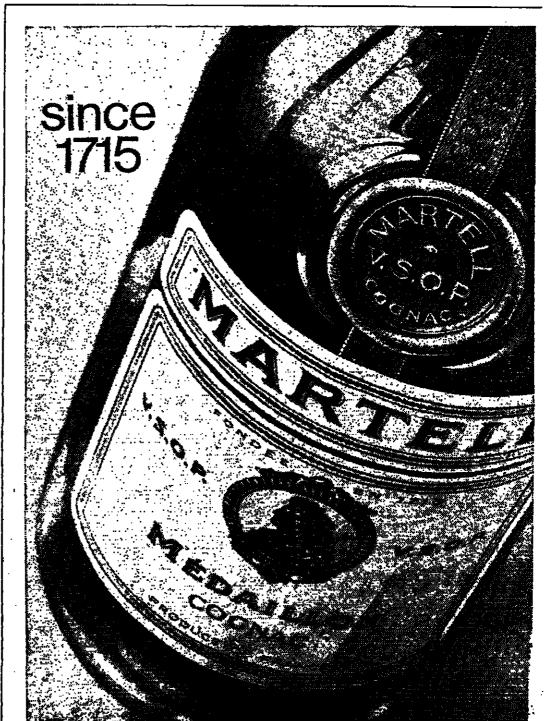

Mines Minister Valentin Her nandez said yesterday that cur-rent international conditions are not conducive to a lowering of petroleum prices. The only change possible as far

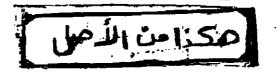

as oil prices are concerned is up

THE SECRET GLASS

By Beryl Bainbridge, George Braziller. 153 pp. \$5.95,

Reviewed by Anatole Broyard

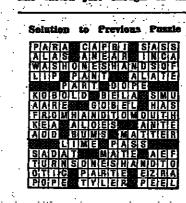

war has so changed the familiar rituals of the inhabitants that the old can only look back and the young flounder in search of novel-ty. The chief source of this novelty, for most, is the American soldler, who is as discriented, in a different way, as they are. In "The Secret Glass," he is seen as a terrifyingly ambivalent figure, who gives with one hand and takes away with the other-who trades food, cigarettes, chocolate, radios and even refrigerators for the only riches the Lancashire girls have to offer: their bodies

It is not altogether his fault: this is the only part of these girls that he can reach. And he is as lonely in his uniform as they are in their disruption. While he fears the possibility of death by violence, they face the certainty of theirs by attrition, by a shriveling of the self.

In these unpropitious conditions, the 17-year-old Rita falls in love with the American soldier Ira. It is not a lucky choice on either side. Rita's stillborn romanticism, almost mute, can find no common ground for his bored-lust. The two of them are contradictions in terms. When they go on a date, she takes him to the country and tries to communicate a few strangled memories of some childhood idyll. A city girl, she can only see love as a pastoral ecologue. To a farm boy like Ira, who looks at a landscape as a kind of factory, their excursion is senseless. Her sentimentality is like a buzzing of insects around his head. She is a wild flower yearning to be plucked, but he would do better to go to a florist's, one of the many brothels in the town.

Rita's mother died when she was five and her father, "a-squeamish butcher," has given her to his two middle-aged sisters to raise. Nellie, the elder, is a dressmaker whose sewing ma- in his freezer. Then, under pre-chine is a symbol of her deter- sure of this sudden urgency; ! mination to keep the fabric of her family's life stitched together. Her dead mother's furniture, which she is removing piece by plece from the parlor to a storage room, stands for her belief in the future. Some day, Rita will sit primly among these relics, taking tea on the rosewood table. set off by the bamboo stand with the aspidistra plant.

Marge, Rita's other aunt, is a widow, one of those types that prompted D.H. Lawrence to say: Bursten figs won't keep." She

IN 1944, life in Lancashire, Enjoys of love to what her ap t gland, is so drab that only love petite. With her husband on her can conceivably light if up. The wedding night, Nellie in the next at war has so changed the familiar room with the blanksts over her head, "There was no excitement," no joy. It was the doctor tapping her chest, it was an illness." The rest of their brief marriage was no better, but Marge is a wouldbe adventurer. She knows there: is more.

> Beryl Bainbridge evokes Marge in a single, cruel and tender. stroke, simply by describing her dress: "She looked like a woman gutted by fire she was wearing a dress of a slightly charred texture, several sizes too large for her, with panels of silver let into the bodice. There was a scorel mark at the shoulder and a diamanté clasp at the hip." Marg somewhere between a torch singer and a ragpicker. He dress is the emblem of both he bravery and her pathos. Sh knows, though, that she is close, to the truth than her sister Nel-"That kind of person," shi says, "isn't needed anymore. Like a market researcher, Margi is always trying to discover what the consumer wants, so she can

equip herself for him. Ira is not the xenophobic por trait, the cliche that so man Continental authors indulge in Rather, he is something out o Faulkner, or one of our othe regional novelists. He is "wash ed clean of apology and subter fuge ... wholly himself." Ther is nothing on his mind but th impulses of his body. He cannot see beyond food and sex. In h lack of curiosity, he is hardly hi man. At the same time, th constitutes a kind of innocenc

When Rita's father, the but cher, tries to talk to her abou irs, to prepare her for the poss-bility of disappointment as ihas always known it, he find that he has lost the habit speech. Living alone, exchangit little more than shop talk with his customers and acquaintance he has a tongue as dumb as tho feels it flooding back. He her himself saying "surmise" and "b witch" and is so bemused by it unfamiliar eloquence that he but loses track of what he trying to say. He is upset, to, hy his own animation. Who ca tell where it might lead? He a man who cares "what il neighbor said, if he caused go sip, if he owed money, if t seemed to be too much alive."

"The Secret Gless" takes a ver bleak view of life, even in sa-a time as 1944 and such a pla-Britain. Miss Bainbridge's ma characters are not simply, if theatrically, isolated, pathologically leary of life. Only Marr rises to an absurd hope, and the when it is too late. Though tinathos of the book is shot throw. with subtle coloration, it does n always appear inevitable. Ril her father and Nellie may be vi timized by the author's conde-cension, her underestimation their stubborn hearts, as mu as by their circumstances.

Mr. Broyard is a book critic 1 The New York Times.

the Greater New York Bridge Association's recent Swiss team championship. West opened two spades, giving South some problems. The best he could do was to make a take-out double and then persevere to three no-trump when North bid diamonds, The 5-3 heart bid was not uncovered, but this was no great hardship since four hearts would surely have failed.

West felt convinced that South held the A-Q of spades, and that a spade lead would give away a trick. He determined that he would give nothing away if he could avoid it, but as often happens this made matters worse in the long run.

The opening lead of the club king was allowed to win, and West shifted to the heart jack. This gave South some comfort, but in fact made no difference since South was destined to make four tricks in the suit in any
